INVESTOR IN PEOPLE

**PRIORITY DOCUMENT**  
SUBMITTED OR TRANSMITTED IN  
COMPLIANCE WITH  
RULE 17.1(a) OR (b)

The Patent Office  
Concept House  
Cardiff Road  
Newport  
South Wales  
NP10 8QQ

I, the undersigned, being an officer duly authorised in accordance with Section 74(1) and (4) of the Deregulation & Contracting Out Act 1994, to sign and issue certificates on behalf of the Comptroller-General, hereby certify that annexed hereto is a true copy of the documents as originally filed in connection with the patent application identified therein.

In accordance with the Patents (Companies Re-registration) Rules 1982, if a company named in this certificate and any accompanying documents has re-registered under the Companies Act 1980 with the same name as that with which it was registered immediately before re-registration save for the substitution as, or inclusion as, the last part of the name of the words "public limited company" or their equivalents in Welsh, references to the name of the company in this certificate and any accompanying documents shall be treated as references to the name with which it is so re-registered.

In accordance with the rules, the words "public limited company" may be replaced by p.l.c., plc, P.L.C. or PLC.

Re-registration under the Companies Act does not constitute a new legal entity but merely subjects the company to certain additional company law rules.

Signed

*W. Evans*

6. If you are declaring priority from one or more earlier patent applications, give the country and the date of filing of the or of each of these earlier applications and (if you know it) the or each application number

Country

Priority application number  
(if you know it)Date of filing  
(day / month / year)

7. If this application is divided or otherwise derived from an earlier UK application, give the number and the filing date of the earlier application

Number of earlier application

Date of filing  
(day / month / year)

8. Is a statement of inventorship and of right to grant of a patent required in support of this request? (Answer 'Yes' if:

YES

- a) any applicant named in part 3 is not an inventor, or
  - b) there is an inventor who is not named as an applicant, or
  - c) any named applicant is a corporate body.
- See note (d).

### Warning

After an application for a patent has been filed, the Comptroller of the Patent Office will consider whether publication or communication of the invention should be prohibited or restricted under Section 22 of the Patents Act 1977. You will be informed if it is necessary to prohibit or restrict your invention in this way. Furthermore, if you live in the United Kingdom, Section 23 of the Patents Act 1977 stops you from applying for a patent abroad without first getting written permission from the Patent Office unless an application has been filed at least 6 weeks beforehand in the United Kingdom for a patent for the same invention and either no direction prohibiting publication or communication has been given, or any such direction has been revoked.

### Notes

- If you need help to fill in this form or you have any questions, please contact the Patent Office on 0645 500505.
- Write your answers in capital letters using black ink or you may type them.
- If there is not enough space for all the relevant details on any part of this form, please continue on a separate sheet of paper and write "see continuation sheet" in the relevant part(s). Any continuation sheet should be attached to this form.
- If you have answered "Yes" Patents Form 7/77 will need to be filed.
- Once you have filled in the form you must remember to sign and date it.
- For details of the fee and ways to pay please contact the Patent Office.

Patents Form 1/77

## ACOUSTICALLY ACTIVATED MARKETING DEVICE

The present invention relates to an acoustically activated marketing device. The consumer obtains the device from a retailer. He/she wears the badge while at the cinema or while listening to the radio or TV. When a specific advert is broadcast the badge interprets part of the sound-track and activates the display on the badge.

### Masking by Other Sounds

When the advert is played, the consumer may be in an area of high noise, for example in the midst of conversation in a cinema or at home, or when driving in a car. This noise may mask the code signal and prevent the display from being activated. This should ideally not be greater than 1 non-activation out of 10 or 20 occasions.

### Unintended Activation

While the consumer is wearing the badge, it will be subject to many different sources of noise, for example; conversation, music, car noise, etc. These could, by chance, contain a sequence of sounds that are sufficiently like the code to trigger the device. The probability of this type of 'false alarm' occurring can be reduced by increasing the complexity of the signal code, but this may be at the expense of battery life or badge cost. Less than 1 in 100 badges should be unintentionally activated during their lifetimes, with a maximum acceptable limited of 1 in 20.

### Operating Lifetime

The required operating lifetime of the badge is expected to be application-dependent. Long operating lifetimes will require higher cost batteries or lower power circuits.

## BEST AVAILABLE COPY

### Cost Reduction

To minimise the production cost, the development of an integrated circuit specific to this application will be required. This will require low-cost packaging, for example the integrated circuit can be directly mounted on the printed circuit board and then protected from the atmosphere by a 'blob' of plastic. For this type of ASIC to be viable, large production runs will be necessary. The requirement for such runs will make it more difficult to adapt the IC to a different application. Some degree of programmability may be possible, however this may require the use of a more expensive production process.

### Drawings

An example of a marketing device is shown in Fig. 1. The device comprises a low-cost display, a microphone, connected to an A/D interface, a programmable digital processor and a battery source.
